Jl. Menoreh Barat VI No.45 Sampangan, Kec. Gajahmungkur, Kota Semarang

I am a student at Dian Nuswantoro University Semarang. The expertise that I am currently pursuing is in the field of fullstack web developer. I want to hone my skills here by learning new things and learning to solve a programming problem. My dream is to be able to master many programming languages.

Project Experiences

Binar Academy   May 2022 - Present
Traditional Game
create a website using node js, make rock paper scissors game inside, implement express js to create server and use git as repository.

- https://traditional-game.herokuapp.com/

University Dian Nuswantoro - **Semarang**   Aug 2021 -
Travel Ticket Web Application
create a travel ticket web application, using the PHP programming language and the Laravel framework.

University Dian Nuswantoro - **Semarang**   Jun 2021 -
Application Mobile
I made an android-based laundry application, using the Java programming language. and retrofit as a bridge to MySQL. In the application I use the CRUD concept, where the admin can create data for new customers, view data to ensure customer data has been entered into the list, edit data to make changes to customer data, and delete customer data that has finished laundry.

Education Level

Universitas Dian Nuswantoro - **Semarang**   Aug 2019 - Dec 2023 (Expected)
